What requirements do you have to fulfil to support YoungstarsWiki.org?

To post a YoungstarsWiki.org article to facebook you hardly need any technical know-how. To write an article requires a certain amount of experience in children and youth work. If you are proficient in a foreign language get down to translating some articles.

Ask yourself how you want to get involved and simply get started whether it is morning, afternoon or evening... there is always something needs doing. All you need is an Internet connection.

What do I get out of it by participating in YoungstarsWiki.org?

Imagine you were to discover a ingenious and use it for his next teenager event and game and try it out in your Christian teenager work. You would think: „Hey, that could also interest other youth leaders!“ Then write

„**Knowledge is the only resource, which increases when it is shared.**“

a Wiki artikel about your game. A couple of days later you will find another Youngstars-Wiki.org supporter who could translate this contribution into English. Two days later someone in Slovakia could come across it,

and use it for his next teenager event and translate it directly into Slovakian. Thus in this way a co-worker may also make this article available to others involved in Christian children’s and youth work in his country. And everything began because you thought up a brilliant game and wrote an article about it...
