Gameplay:

Any number of players roll five dice in turn. First, each player checks to see if any of their ticked numbers from their "dash set" are there. If this is the case, all players draw a line behind one of their ticked numbers. The corresponding die with its number is not taken into account for this roll. It may not be used for the combination (see below). Each player must mark a number from the set of lines on each roll; an exception is if none of his three marked numbers occur.

Die Zahlen auf den übrigen vier Würfeln zu je zweifache Zahl auf der Bewertungstabelle einen Strich

der Strichmenge.

Die Zahlen 6, 3, 4 und 2 zusammenziehen

zu $10 + 5$ oder zu $7 + 8$

den Strich hinter beide Zahlen auf der Bewertungstabelle

der Strichmenge.

Die Zahlen 6, 3, 1 und 2 zusammennehmen zu $9 + 3$ oder $4 + 8$

So for each roll, two dashes are made in the scoring table and one dash in the dash set. The game is played by a player until there are eight dashes behind a ticked number from the dash set. Each number combination that is started counts 200 minus points if it has less than five dashes; if there are five dashes, the value = 0. Each additional dash above five counts the value from the first row of numbers. However, only five more dashes are scored, although the player may apply more.

wertung:

II - 200

III 0

III III + 150

I - 200

III III + 150

III III + 300

+ 600 - 400 = 200 Punkte
