Gipsmasken erstellen

Gipsmasken können für ein Theater oder als Deko verwendet werden. Hier erfährst du, wie man sie erstellen kann.

Material

- Gypsum bandages
- Bowl of water
- Levea cream or otherwise a greasy cream
- Paint/acrylic paint
- possibly some spray paint

Process

Either outside on the floor or cover the floor with plastic.

||

Cut the plaster bandages into large and small pieces - best in a kettle/container.

||

In partner work: Someone creams their face very very well with Nivea cream (also eyebrows and at the hairline) - you can also cover the hairline and eyes with cling film for safety.

||

The second person takes a plaster binder puts it in a bowl filled with water and puts it on the face and so on (a plaster mask needs about 4 layers).
Caution: Leave nostrils free!!!

||

When the face mask is dry, the person can try to make grimaces under the mask so that it slowly comes off.

||

Finished: Now you can let it dry for a short time and paint it. With gouache, I would paint it when it is completely dry (takes a few days to dry). With acrylic paint, this is not necessary.

When cleaning up, don't pour the plaster water into the sink (the plaster settles) but outside into the bushes.
