Path for the Blind

To walk the world without eyesight is a challenge for those who are not used to it. There is a lot to discover here. For the participants, this can be a real adventure

Framework

Group size: 5-20 people

Age: 8+

Duration: 30-45 minutes

Location: Forest, outside (reasonably varied area)

Materials needed

- Rope/s (for a distance of 50-100m)
- Eye pads

Idea

In a varied section of land, a rope is stretched at shoulder height of the participants.

The rope can go over small pits, obstacles, rocky or sandy areas, etc.

The participants are blindfolded. One by one, with a sufficient distance, they are led to the rope, which they have to follow until the end.

The participants are blindfolded

Nodes

Nodes can be inserted at some points on the rope to draw the participant's attention to a special feature. For example, here they can feel something special or there is a special difficulty to overcome.

Note

It gets more interesting when participants don't see the path beforehand.
