Snow Road/Maze Catching

Tread out several paths in snow that is at least ankle-deep. When playing tag, you may only move along these "snow paths."

No equipment is needed, and you can make these paths with the children

Itinerary

- Treading paths through untouched snow
- Determine the catchers
- Start of the game

Rules

- The game is played just like regular tag, except that when tagging or running away, you may only use the "snow paths."

Variations

- Instead of just roads, a maze is created that also includes paths that end abruptly.
- The people being chased may jump across the deep snow to another trail if there are two of them and they’re holding hands.
