Wood Gel

With a piece of wood and a few nails, you can easily make a hedgehog with even young children, without much effort.

Material

- Wood
- Nails
- Hammer
- Saw

Instructions

Cut the piece of wood so that it can lie reasonably straight, and cut one side at an angle (head).

Use a hammer to drive in long nails, but only far enough so that they still protrude significantly from the wood.

Paint two eyes on the slanted part, glue them in place, or even create them using nails that are driven almost completely into the wood.
