Canon Legs

This game is about building in canon. The imagination must not be missing.

Material

- Take different items to lay: paint, pewter cones, rondo, stones....

Gameplay

The children form two rows of one meter apart, the side neighbors sit closer. The children in row 2 look to their opposite, building at the same time. The children in row 1 look at their neighbor to the left and build one at a time, as shown in the drawing (see cover image above). Once the five or seven sticks are laid, the children watch "canon-laying" as the completion of the pattern moves.
