Paracord-Vertüferli Identity (DNA)

This article serves as inspiration for a small paracord keychain made from paracord scraps, on the theme of identity in God.

Mini DNA – Sprinkler

Perfect for scraps

1. Wrap a piece about 15 cm long around the keyring
2. A second piece, about 60 cm long, is tied in a standard knot at the top around the center strand
3. Make a cobra knot
4. The cobra knot is always tied on the same side to create the twist
5. Continue tying until 2–3 twists have formed.
6. The ends are cut off and fused together

DNA is a symbol of our identity and our identity in God.

Tying a Cobra Knot

1. Place the left cord over the center (2 cords)
2. Pass the right cord over and behind the middle cords
3. Pull the left loop back from below
4. Tighten
