Seifenkistenrennen - Solarmobil

Wir organisieren ein Seifenkistenrennen mit möglichst geringem Aufwand. Dies kann die Teenies und Kinder anspornen, ihre eigenen Seifenkisten zu bauen.

Basic Idea / Goal: Soapbox racing? Yes!

This is how contacts are made with village and neighborhood residents and a relationship of trust can grow.

Duration / Period / Effort:

The race takes place on a Saturday.

Suitable for:

Teens and children in a village or neighborhood

Materials Needed:

See under Design

Costs:

We ask from the participants a contribution of about Fr. 10.-, are still looking for some sponsors and run a festive economy at which a profit is generated. With 50 participants the income and expenses amount to approx. 3'000.- each.

Execution of the project:

With an organization team, the race day is prepared.

Responsible for race procedure

They organize traffic boards, straw bales, fencing of the race track, timing, starting ramp, public address system and people for the actual race day.

- Responsible for catering
 You organize benches, tables, food, drinks and staff for the sale. No alcohol will be served
- Responsible for office work
 Authority contacts, permit requests, registrations, advertising the event in the parish newsletter
 of the local newspaper and with posters/handouts, start list (there is a lot to do), evaluation and

YoungstarsWiki.org

ranking, purchase of prizes/gifts

The race will be held in four categories (separated by age group). There will be a trial run for each participant as well as two applicable running times. Rules and regulations should be drawn up, including the penalty point system.

Important notes:

Bad weather variants: Either the race will be canceled or a rescheduled date must be set in advance.

SOLARMOBILE

The race could be done with solar mobiles. A group of the Blue Cross in Baselbiet has built a solar mobile itself.
