Strength and weakness of Prezi

By building a Prezi-presentation you have to think through your entire presentation holistically before you begin to construct the presentation at all. This **holistic view** is the strenght but might also be the weakness of Prezi.

Another chance but also weakness of Prezi is that it is **webbased**. Everywhere you go you can have access to your presentation... unless there is a (good) networkconnection.

Decisions you have to make before building

- What do I need to cover in my talk?
- How long do I have to cover it?
- Who is my target audience? What are their hot buttons – dreams, concerns, etc?

You **MUST** give these thought before I begin the process of constructing a Prezi.
